Subject: RE: ARB Meeting with UC San Diego Researcher on VW ECU Programming

Hi Todd –

We at OECA would definitely be interested in joining in via video conference.

I'm not sure who on our end will ultimately coordinate logistics, but we will be sure to nail that down closer to the date.

Thanks!

Eleanor

Thanks Todd.

We are very much interested in this topic and really appreciate you reaching out to us regarding this meeting. We would like to be tied in via video if possible. Theresa Davis from our team can handle the logistics on our end. I have copied Theresa on this note. She can also be reached at (734) 214-4540.

Thanks,

Byron

Subject: ARB Meeting with UC San Diego Researcher on VW ECU Programming

Byron, Eleanor,

We have tentatively scheduled a meeting with Dr. Kirill Levchenko, who is the lead researcher of the recently published study described below, for July 20th at 10 AM PST in El Monte. He is going to present on his research, and his thoughts for identifying defeat devices in code. If you are interested we could setup a videoconference with Ann Arbor, DC, or possibly both, and if worth your time you are of course welcome to come out to California.

http://ucsdnews.ucsd.edu/pressrelease/researchers_find_computer_code_that_volkswagen_used_to_cheat_emissions_test

<http://cseweb.ucsd.edu/~klevchen/diesel-sp17.pdf>

Please let me know if you are interested, and if so who would be a good administrative person to work with on logistics.

Thanks,

Todd Sax, D.Env.
